

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

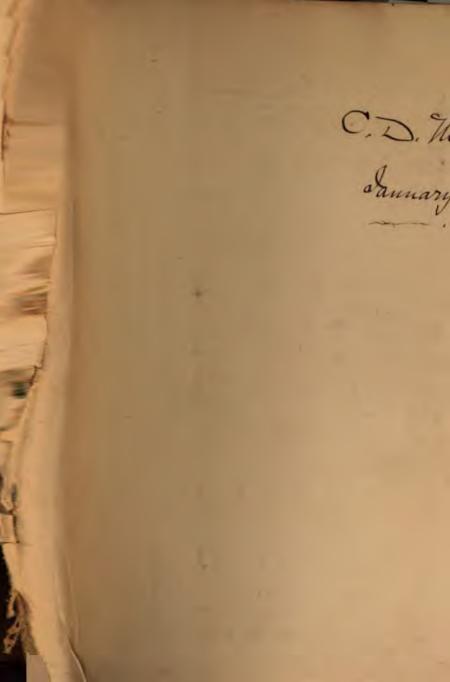

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

Are, ar, the unit of surface measure. [Fr. are, L. area.] Contiare, sent'i-ar, the hundredth part of an are. Centiare, sentriar, the hundredth part of an are.
Centigram, sentri-gram, the hundredth part of a gram.
Centilitre, sentri-li'tr, the hundredth part of a litre.
Centimetre, sentri-li'tr, the hundredth part of a metre.
Centistere, sentri-ster, the hundredth part of a stere.
Declare, desi-ar, the tenth part of an are. Decigram, des'i-gram, the tenth part of a gram, Decilitre, des'i-li'tr, the tenth part of a litre. Decimetre, des'i-me'tr, the tenth part of a metre. Decistere, des'i-ster, the tenth part of a stere. Dekagram, dek'a-gram = ten grams. Dekalitre, dek'a-li'tr = ten litres. Dekametre, dek'a-me'tr = ten metres. Dekare, dek'ār = ten ares. Dekastere, dek'a-stër = ten steres. Gram, gram, the unit of weight. [Fr. gramme, Gr. gramma, that which is written, a letter, a small weight.] Hectare, hekt'ar = one hundred ares. Hectogram, hekt'o-gram = one hundred grams. Hectolitre, hekt'o-li'tr = one hundred litres. Hectometre, hekt'o-me'tr = one hundred metres.

Kilogram, kil'o-gram = one thousand grams.

Kilolitre, kil'o-li'tr = one thousand litres. Kilometre, kil'o-me'tr = one thousand metres. Litre, Il'tr, the unit of measure of capacity. [Fr.—Gr. litra = L. libra, a pound.]

Metre, më'rr, the unit of length. [Fr.—Gr. metron, a measure.]

Millier, mil'i-er = one thousand kilograms. Milligram, mil'i-gram, the thousandth part of a gram.
Millitre, mil'i-l'tr, the thousandth part of a litre.
Millimetre, mil'i-me'tr, the thousandth part of a metre. Myriagram, mir'i-a-gram = ten thousand grams. Myriametre, mir'i-a-më'tr = ten thousand metres. Quintal, kwint'al = one hundred kilograms. [Fr.—L. centum, a hundred.]
Stere, ster, the unit of cubic measure. [Fr.—Gr. sterees, solid.]

PREFACE

This Work will, it is believed, supply the want, so long felt, of a Dictionary based on the etymological relations of words, and exhibiting the results of the latest philological research, at a price quite within the reach of every School.

The Dictionary contains the Etymology, Pronunciation, and Meanings of Words.

The Vocabulary contains every English word, with the exception of obsolete and very rare words, and technical terms not found in general literature. It includes, however, all the obsolete words that occur in the Bible. Great attention has been paid to the insertion of words in Natural History, Botany, Geology, Physics, Physiology, and other sciences, which of late have become more commonly the subject of study in schools. Numerous Phrases have also been introduced. Each uncompounded verb has its participles placed after it, and its past tense when different from the past participle, and exceptional plurals and adverbial forms are given.

The Arrangement of the words is etymological, while the alphabetical order is strictly preserved by means of references. Words derived from the same root, but with different affixes, are grouped together, the first word of each group being printed with a capital initial, and the derivatives under it with a small letter, while the groups themselves are separated from each other by a space.

The Pronunciation is exhibited in the simplest manner possible. The correct sound of every word is given by being written anew phonetically, thus obviating the use of a confusing array of marks. The syllabication and accentuation have also been carefully attended to, and different pronunciations given in cases where authorities are divided.

The Meanings are based on the root-ideas of the words, a plan not only logically correct, but calculated to give increased vividness to the conception. The primary meaning is given first (in italics), and the secondary meanings in the order of their logical connection with the primary one, different classes of meanings being separated by colons. The greatest care has been taken to express the meanings in the simplest language, a feature in respect to which this Dictionary will bear favourable comparison with any similar work.

Special attention has been paid to the definitions of the scientific and Technical terms, which will be found fully abreast of the present state of science, while they are expressed in the simplest language.

vi PREFACE.

The Etymological part of the work has been prepared with the greatest care, and will be found to embody the very latest researches into this most interesting subject. The derivation of every word (so far as has been discovered) is given, each word being traced back, step by step, to its ultimate source, and the meaning of each foreign word distinctly told. In doubtful cases the more probable etymologies have been inserted. Contrary to the usual practice, the etymology has been enclosed in brackets at the end of each word, as allowing the speedier discovery of the meanings, and being in many respects a preferable arrangement to that usually followed.

In this department full advantage has been taken of the labours of Bopp, Pott, Grimm, Curtius, Diez, Donaldson, Max Müller, Latham, Garnett, Trench, Wedgwood, and others, who have investigated the Etymology of our language, a study which of late years has made such marked advances. The Editor begs specially to express his obligations to Mr Wedgwood's valuable Dictionary of English Etymology, lately completed—a work which no student of Etymology should be without.

A copious list of Prefixes and Affixes, with their signification, derivation, and affinities, as far as ascertained, has been appended to the work.

It is confidently hoped that this Dictionary will be found not only eminently suitable for general educational and practical purposes, but also peculiarly adapted for assisting in the higher philological study of the English language in advanced classes.

The Editor has much satisfaction in expressing his obligations to Henry Weir, Esq., M.A., Caius College, Cambridge, Classical Master in the Edinburgh Academy, for his assistance in the etymological portion of the work; and to William Jolly, Esq., Head English Master, George Watson's Hospital, Edinburgh, for his co-operation in the revision of the whole work, and for many valuable suggestions.

J. D.

NOTE TO THE PRESENT EDITION.

Since the issue of the first edition, advantage has been taken of the numerous reprints that have been called for, to correct inaccuracies and insert omitted words. The following additions have also been made—the obsolete and rare words in The Afocrypha, The Book of Common Prayer, and The Scotch Metrical Version of the Psalms, have been inserted, and a Glossary of the obsolete and rare words and meanings in Milton's Poetical Works, and several useful Lists, have been given at the end.

EXPLANATIONS TO THE STUDENT.

The Arrangement of the Words.—Every word is given in its alphabetical place, printed in Clarendon, and there its meanings, &c. will generally be found. In certain cases, however, the word is referred to another, under which it is explained in its relation to words derived from the same root. Participles are always placed after their verbs, and adverbs generally after their adjectives. When a word stands after mother, with no meaning given, its meanings can be at once formed from those of the latter, by adding the signification of the affix: thus the meanings of darkness are obtained by prefixing the meaning of ness, state of being, to those of dark.

The Pronunciation.—The Pronunciation is given immediately after each word, by the word being spelled anew. In this new spelling, every consonant used has its ordinary unvarying sound, none being employed having more than one sound. The same sounds are always represented by the same letters, no matter how varied their actual spelling in the language. No consonant used has any mark attached to it, with the one exception of th, which is printed in common letters when sounded as in thick, but in italics when sounded as in then. Unmarked vowels have always their short sounds, as in lad, led, lid, lot, but, book. The marked vowels are shewn in the following line, which is printed at the bottom of each page—

fâte, fâr; mē, hèr; mīne; môte; mūte; môon.

Where more than one pronunciation of a word is given, that which is placed first is the more accepted.

The Spelling.—When more than one form of a word is given, that which is placed first is the more usual spelling.

The Meanings.—The primary meaning of every word is given first, in italics. The word literally (lit.) before a meaning, signifies that that is the meaning according to the letter, though it is not now, and may never have been, in use in the language; the word originally (orig.), that the meaning following once existed, though now obsolete.

The other meanings are arranged in the order of their connection with the root idea, those nearer the literal meaning being placed first; and they are classified in groups, separated by colons.

In B_n before a meaning, signifies that it is used in the Bible in that special sense, though it does not imply that the other meanings of the word may not also be used there.

The Etymology.—The Etymology of each word is given after the meanings, within brackets. Where further information regarding a word is given elsewhere, it is so indicated by a reference. When no etymology follows a word, this implies that its derivation is given above, under the chief word of which it is a derivative. Where the etymology of a word is doubtful, different opinions are given; and where unknown, a query [?] is affixed. Under each word, the prefixes with their meanings are always stated, but not the affixes, although the force of the latter is always given under the literal meaning. A full list of Prefixes and Affixes, with their significations and roots, will be found in the Appendix.

. The student is recommended at once to master the following list of abbreviations occurring in the work, which will be found to suggest their own meaning.

Abrade, a-brad', v.t., to rub or wear off: pr.p. abrād'ing ; pa,p. abrād'ed. [L. ab, from, off, rado, rasus, to scratch or rub.

abrasion, a-bra'zhun, n., the act of rubbing off.

Abreast, a-brest', adv. with the breasts in a line; side by side. [A.S. a for on, and breast.]

Abridge, a-brij', v.t. to make brief or short :- pr.p. abridg'ing; pa.p. abridged'. [Fr. abreger; Prov. abbreujar-L. abbrevio, are. See Abbreviate.] abridgment, a-brij'ment, n. contraction; summary.

Abroad, a-brawd, adv. with a broad space between; out of doors; in another country. [A.S. on, brad.]

Abrogate, ab'ro-gat, v.t. orig. to ask permission from the people to do away with a law; to repeal; to annul:-pr.p. ab'rogating ; pa.p. ab'rogated. [L. ab, from, rogo, rogatus, to ask.]

abrogation, ab-ro-ga'shun, n., the act of repealing. Abrupt, ab-rupt', adj., broken off; craggy; sudden; unexpected .- adv. abrupt'ly .- n. abrupt ness. [L. abruptus-ab, from, rumpo, to break.]

Abscess, ab'ses, n., the going away or gathering of matter into some part of the body. [L. abscessus

-abs, away, cedo, cessum, to go.]

Abscind, ab-sind', v.t., to cut off: -pr.p. abscinding; pa.p. abscind'ed. [L. ab, off, scindo, to cut.] Abscond, ab-skond', v.i. lit. to hide from view; to withdraw one's self :- pr.p. absconding; pa.p. absconded. [L. abs, from, condo, to hide.]

Absent, ab'sent, adj., being away from; not pre-sent; inattentive. [L. abs, away from, ens, entis,

being, from sum, to be.]

absent, ab-sent', v.f. to withdraw one's self; to keep

away: -pr.p. absenting; pa.p. absented.

absence, ab'sens, n., the state of being absent; want.

absentee, ab-sen-te', n., one who absents himself; a landowner who lives and spends his money out of his country .- n. absenteeism, ab-sen-te izm.

Absinth, ab-sinth', n. lit. the unpleasant; sweetened spirit flavoured with the young tops of wormwood. [Fr.; L. absinthium, Gr. apsinthion, wormwood-a, priv., psinthos, pleasure.]

Absolve, ab-zolv', v.t., to loose or set free from; to pardon; to acquit: -pr.p. absolving; pa.p. absolved'. [L. ao, from, solvo, solutum, to loose.] absolute, ab'so-lut, adj. free; complete; unlimited;

certain.—adv. ab'solutely.—n. ab'soluteness.
absolution, ab-so-lo'shun, n. release from punishment; acquittal; remission of sins.

absolutism, ab'so-lut-izm, n., the state or principles

of absolute government.

absolutory, ab-sol'0-tor-i, absolvatory, ab-zolv'a-tor-i, adj., that absolves.

Absorb, ab-sorb', v.t., to suck in from; to swallow up; to engage wholly: -pr.p. absorbing; pa.p. absorbed. [L. ab, from, wrbee, to suck in.] absorbable, ab-sorb-lo, adj., that may be absorbed. absorbed, absorbed, absorbed; swallowing.

-n, that which absorbs. absorption, ab-sorp'shun, n., the act of absorbing :

entire occupation of mind

absorptive, ab-sorp'tiv, adj., having power to absorb. Abstain, ab-stan', v.i., to hold or refrain from :-

Accolada

fr. A. abstain'ing; fu. A. abstrined'. [L. ab-rines—abs, from, innes, to hold.] bettemen, abs't-ness, n., a refresheding from, ospe-cially from some indulgence, as food, drink, dec. bethank, also timent, adj., obetaining from; temperate.—adv. also timently.

Abstinunce. See under Abstata.

hetrast, abe-trakt', v.f., to draw oway from; to separate; to make a summary:—pr.p. abstract'-ing; ps.p. abstract'ed. [L. ase, away from,

trake, tructus, to draw.]

abstract, abstract, and a semanary; an abridgment.
abstract, abstract, adj. separate; distinct from anything else: difficult: designating an attribute or
quality of an object or event.—adv. abstractiv.
—a. abstractmen.
